# حديقة التراث

## Operating All Electric Assets In The Park:

- All Types of Public W.C.
- Park Lighting All
- Park Fountains
- All Kiosks and Sales Points

## Important Notes to Consider During Pilot Project Implementation

- ☐ Consider installing the solar cells in locations that are not very exposed visually and are aesthetically suitable.
  - ☐ Consider during Implementation not to eliminate the main grid power source that is currently feeding these assets.
  - ☐ The contractor to obtain all permits as per Abu Dhabi Municipality regulations.
  - ☐ To Provide all the necessary safety measures during the implementation of the project.
  - ☐ To define who will be responsible for the operation and maintenance of these panels, and provide all necessary spare parts.
  - ☐ Provide all warranties and catalogs for the new system.
-
